

Sub : Appeal for Rotary Humanitarian Project for Dialysis Centre

Dear sir,

I am a member of Rotary Club of Bangalore Indiranagar (RCBI).

This year, District 3190 - District Governor, Rtn. Badari Prasad is from our home club.

Diabetes is one of the chronic diseases affecting significant population in India, where dialysis treatment can be prohibitively expensive and unaffordable for the poor and needy. Therefore in the interest of serving the needy people in the community, we have taken up a project to set up a Dialysis Centre for low income group as a signature project.

The Maharaja Agrasen Hospital is run on charitable basis in which I am also one of the trustees. The dialysis center shall be set up in this hospital.

The total project cost is approximately US\$ 48,000.00 (US\$ forty eight thousand only)

We are seeking support from international partners in Rotary Club to extend their minor / major contribution so that the project can be qualified under Matching Grant category under Rotary Foundation. We are looking forward to your help or reference to your friends who are fellow Rotarians to request their Rotary Club to extend their support to whatever extent possible on this project.

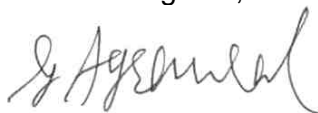

RCBI is one of the most socially active club, involved in various civic community service projects as can be seen from the website (www.rotaryindiranagar.org)

It would be our privilege to associate on this project with any of the Rotary Clubs in your area to support this noble cause.

We look forward for your valuable support and encouragement to execute this project successfully.

Thanking you,

With kind regards,

Rtn. Ghanshyam Agrawal
Managing Director
