Project planning

Describe the community needs that your project will address.

Affordable access to safe water is fundamental to the health and dignity of all.

Children are blighted by the multiple deprivations of poverty, lack of education and ill health that often accompany poor water.

Below are the facts about access to Water in Egypt.

6.470.000 Estimated number of Egyptians live in households without water connection.

13.3% Percentage of households without water connection in rural areas

1.5% Percentage of households without water connection in urban areas

5,000 Estimated number of children under the age of 5 who die yearly due to diarrheal disease

1,500,000 Estimated number of Egyptians that rely on water from tanker trucks or carts.

0.8% The annual average loss (cost) of Egypt's Gross Domestic Product (GDP) due to diarrhea diseases and mortality primarily affecting children, caused by lack of access to safe water and sanitation, and inadequate domestic, personal and food hygiene.

How did your project team identify these needs?

How were members of the benefiting community involved in finding solutions?

How were community members involved in planning the project?

We addressed the local people of the targeted community to assess their needs and choose the appropriate area to implement the proposed project.

The project aligns with local initiatives as the authorities have a main supply of clean water running under these villages but the houses are not connected

Project implementation

#	Activity	Duration
1	signing protocol with Fayoum water company	2 weeks
2	choosing beneficiaries	one month
3	purchasing equipment and supplies	one month
4	connections to houses	six months

Will you work in coordination with any related initiatives in the community?

Please describe the training, community outreach, or educational programs this project will include.

How were these needs identified?

What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?

List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.

Budget

Will you purchase budget items from local vendors?

Did you use competitive bidding to select vendors?

Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.

Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?

The lines will be maintained via the local water company all parts are available locally

If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?

After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.

The lines shall be owned by the Fayoum local water company (a non profit governmental company) as they will be responsible for their maintenance in the future the materials cannot be moved or sold in future as they will be custom cut and fitted to each household and buried under ground
